UL-142 SECONDARY CONTAINMENT FAST FUELER TANKS

Our newest innovation, is the "Fast Fueler". This system is a pre-engineered, fully assembled fuel storage tank package delivered to your site for easy installation. Simply provide a concrete pad with electrical service and your ready to go. We'll even provide pad drawings suited for your application. The "Fast Fueler" is a complete fueling system for your diesel, gasoline, aviation fuels, Bio-diesel, Asphalt and other chemical dispensing units. Our systems meet or exceed recognized industry codes and standards certifications (all tanks are labeled and listed conforming to Underwriters Laboratories UL-142 or UL-2085). Capacities for your system can vary from 300 gallons up to 50,000 gallons, and are custom designed and entirely self-contained. The "Fast Fueler" can be mobilized by simply relocating the tank to another pad or site for your convenience. "Fast Fueler" systems are an environmentally friendly economical alternative to serve all your fueling needs.

Manufacturing Tanks for over 50 Years

Each tank manufactured by General Industries, Inc. must pass a multi-step quality control program. Tanks are tested at various stages during the manufacturing process to assure quality, with all results documented for future inspection.
